EDWIN RAJ A

QUALITY ASSURANCE ENGINEER

5/19 vaigai Nagar West Tambaram Chennai-45| 7845704938 | edwinrajcool@gmail.com

CAREER SUMMARY:

Results-driven QA Engineer with 5+ years of experience in manual and automation testing across web, mobile, and API layers. Proven ability to raise quality standards through structured test strategies, strategic automation, and continuous process improvement, reducing manual effort and integrating quality early in the development cycle. Adept at collaborating cross-functionally to ship reliable software at scale. Seeking a role where I can lead quality initiatives, influence technical decision-making, and drive product reliability across the full development life cycle.

WORK EXPERIENCE:

Talentship - TSI Technologies Private Limited

Quality Assurance Engineer | Feb 2025 – Present

- Owned end-to-end QA for Jumingo (logistics platform), covering requirement analysis, test strategy, planning, execution, defect lifecycle management, and release sign-off, ensuring high-quality production releases.
- Actively participated in sprint (planning, grooming, retrospectives), providing QA insights and risk assessments to ensure better release readiness and early defect detection.
- Drove continuous improvement in QA processes by identifying gaps, optimizing workflows, and implementing best practices for test design and execution.
- Provided technical guidance and operational support to QA team members through task coordination, test case reviews, and knowledge sharing to maintain high quality standards.
- Worked closely with product owners, developers, and stakeholders to track defects, prioritize issues, and ensure smooth release cycles.
- Designed and maintained automation scripts using cypress framework, increasing regression coverage and reducing manual effort.
- Performed root cause analysis for critical defects and implemented preventive measures to avoid recurrence in future releases.

AMAZON RETAIL INDIA PRIVATE LIMITED

Quality Assurance Technician | Aug 2020 - Feb 2025

- Worked on a last-mile technology mobile application, ensuring the quality, performance, and reliability of end-to-end user workflows across multiple releases.
- Designed and developed automation test scripts using suitable tools and frameworks, focusing on scalability, reusability, and efficient execution of test scenarios.
- Executed automated test cases regularly, analysed test results, investigated failures, and provided detailed reports to stakeholders for quick resolution.
- Identified, documented, and tracked software defects with clear steps to reproduce, severity, and impact, ensuring smooth communication with development teams.
- Conducted test coverage analysis to identify gaps in testing and recommended areas suitable for automation to increase overall test effectiveness.
- Collaborated with automation engineers and cross-functional teams to define test objectives, clarify requirements, and align testing strategies with business goals.

- Actively participated in test case creation, execution, and defect tracking, ensuring proper validation of requirements and traceability.
- Performed manual testing for complex scenarios, edge cases, and areas where automation was not feasible, ensuring comprehensive quality assurance.
- Contributed to test planning, effort estimation, and test strategy discussions, helping in defining timelines, identifying risks, and improving overall testing processes.

Technical Skills:

Programming Languages: Java, JavaScript
Databases / DB Tools: MySQL
Test Automation Tools: Selenium, playwright, Cypress, Appium
Frame Work: TestNG, Mocha
API & Testing Tools: Postman, Insomnia
IDEs / Development Tools: Eclipse, IntelliJ, Visual Studio Code, Android Studio
Project & Monitoring Tools: Jira, Datadog
Test Management Tools: Testrail, Qase, X-ray

TESTING CERTIFICATION

ACCORD INFOMATRIX

MAR 2020 - Successfully Completed JAVA, Software Testing Training Program at ACCORD INFO MATRIX, Chennai, March 2020.

EDUCATION:

2013 - 2017 | Sri Krishna Engineering College Chennai
Bachelor of Engineering - Civil Engineering
